# R800S

R800S with STANAG level 2 armour kit

**The R800S is a heavy-duty remote weapon station that delivers the lethality of a full-sized medium-calibre turret at a significantly lower weight.**

Employing the same interface used in other EOS remote weapon stations, the R800S has been designed for customers who wish to upgrade the lethality of lighter vehicles without compromising payload or making the extensive modifications required to mount a full turret system.

The R800S offers protection options from STANAG Levels 2 through 4, providing tough, light, long-range lethality to a broad range of vehicle classes.
