**EOS T2000**

- **2 x SPIKE™ LR2 Missiles** mounted in an armoured, shock isolated pop-up launcher.
- **Gunner’s Sensor Unit**
- **MAG 58 7.62 mm Coaxial MG** Optional: Mk52 7.62 mm chain gun
- **Bushmaster™ MK44S 30/40 mm cannon**
- Other weapon options: Bushmaster™ Mk3 35/50 mm cannon
- **200 ready 30 mm rounds** Easy stoppage correction and reload while under armour
- **Armour options** from STANAG 2 to STANAG 6
- **Integrated Iron Fist™ active protection system**
- **Integrated sensor suite** with 360° radar, laser warning and IronVision™ see-through armour
- **Flexible smoke grenade launcher options**
- **EOS R400 Commander’s Remote Weapon Station:** 7.62–30 mm weapon options; proven counter UAS performance
- **2 × SPIKE™ LR2 Missiles**
- **Mk52 7.62 mm chain gun**
- **Bushmaster™ Mk3 35/50 mm cannon**
The T2000 has been designed to incorporate key technologies that are now considered vital on the modern battlefield. An active protection system, Iron Fist™, is positioned low on the flanks of the turret to improve engagement angles and prevent interference with other sensors, while the Commander’s remote weapon station (RWS) is mounted forward for improved turret-down depression angles and safety during reloading. The IronVision™ helmet-mounted display provides unparalleled crew safety and situational awareness, and its embedded simulation means crews maintain their skills anywhere. All this technology is presented in the proven user interface used in the thousands of EOS weapon stations currently in service worldwide. It is simple, familiar and user friendly in the heat of battle.

The T2000 is available in both manned and unmanned configurations to suit customer requirements. Additionally, the T2000-DE forms the cornerstone of the Titanis CUAS capability by offering a Directed Energy system that is capable of defeating Group 3 drones at ranges greater than 2 km.

### WEAPON OPTIONS

**Main armament**
- Bushmaster™ Mk44 30 mm/40 mm
- Rheinmetall Mk-30/2 ABM 30 mm
- Bushmaster™ III 35 mm/50 mm
- Able to fire all fused ammunition; breech and muzzle programmable

**Coaxial**
- M240/MAG58 7.62 mm
- Mk52 7.62 mm

**Smoke launcher**
- 76 mm, 66 mm and 40 mm options

**Missiles**
- 2 × SPIKE™ LR 2 integrated
- Javelin™

**RWS**
- R150: 5.56–12.7 capable
- R400: 7.62–30 mm × 113 capable

### COMBAT WEIGHT

2000 kg–6500 kg
- Includes weapons, missiles, active protection system (APS), RWS and full ammunition load

### EMBEDDED SIMULATION

**SIGHTING**

- Common Sensor Unit for all EOS weapon stations and turrets
  - **Day**
    - > 12,000 m
    - > 5600 m
    - > 4700 m
  - **Night**
    - > 13,700 m
    - > 5100 m
    - > 4000 m

**Killer-Killer combination**
- RWS and Commander’s Sight
- R150 or R400 Commander’s RWS allows engagement of simultaneous targets by the commander and gunner
- RWS can also act as a sight for the turret
- Laser designator
- Sensor Unit can be equipped with long range laser designator for joint fire target designation

### PROTECTION

**Passive**
- Armour options from STANAG Levels 2–6
- Optics protected up to STANAG Level 3

**Active (optional)**
- Integrated Iron Fist™ APS

**Counter UAS**
- RWS integrated counter UAS system uses APS radar for active detection
- Includes passive UAS detection system and RF UAS soft kill system
